

HB 755 -- Life Science Research Projects

Sponsor: Leach

Currently, the University of Missouri Board of Curators awards funds for spinal cord injury and congenital or acquired disease process research, which is supported by the assessment of traffic infraction surcharges. This bill specifies that any moneys generated by the Spinal Cord Injury Fund or granted by the board for the research programs will be subject to the provisions of Section 196.1127, RSMo, which ensures that the funds will not be used for abortion, human cloning, or other prohibited human research.
