

HB 1146 -- Intrastate Manufacturing of Certain Incandescent
Lightbulbs

Sponsor: Gatschenberger

This bill specifies that an incandescent lightbulb manufactured in Missouri that remains within the borders of the state and has not traveled in interstate commerce is not subject to federal law or regulation under the authority of the United States Congress to regulate interstate commerce.

The bill requires any incandescent lightbulb manufactured and sold in Missouri to have the words "Made in Missouri" clearly stamped on it. The Attorney General, upon written notification by a resident of his or her intent to manufacture an incandescent lightbulb, to seek a declaratory judgment from a federal district court in the state that these provisions are consistent with the United States Constitution.
