

HB 1804 -- STATE ENERGY PLANS

SPONSOR: Miller

This bill requires the Comprehensive State Energy Plan implemented by the Division of Energy be reviewed and updated if necessary by the division by January 1, 2017, and biennially thereafter. The division must review the plan to ensure it meets specified criteria. To conduct the review, the division must use a diverse stakeholder system or contract with a Missouri-based not-for-profit organization who meets specific requirements. The division must issue a report, along with the review, that suggests policy changes needed to meet set criteria.
