

HB 2261 -- DRIVER'S LICENSE FEE OFFICES

SPONSOR: Jones

In order to comply with federal application requirements that require two people check and verify certain commercial driver's license documents, this bill requires every fee office to establish a system of document verification that allows for a one-business day review on days in which the fee office is only staffed by one person. On any day in which a fee office has only one staff person working, the employee must scan all documents needing verification and forward them to the Department of Revenue main office for review and verification by a department supervisor within one day.
