

HB 892 -- Highways

Sponsor: Bland

This bill requires the Department of Transportation to examine traffic congestion problems in Kansas City at the intersections of 52nd Street and U. S. Highway 71, 55th Street and U. S. Highway 71, and 75th Street and U. S. Highway 71. The department must conduct a feasibility study to determine whether an overpass system should be established at these intersections and whether a direct exit from Interstate 70 to U. S. Highway 71 should be established as well as any other alternatives to help alleviate intersection congestion. A report summarizing the department's findings must be submitted to the General Assembly by December 1, 2004.
