

HB 1234 -- Low-Income Utility Customers

Sponsor: Willoughby

This bill allows the Missouri Public Service Commission to approve the terms and conditions of assistance programs for low-income residential customers, as proposed by electric or gas corporations. The bill also allows the commission to approve energy efficiency, weatherization, and evaluation components that are part of the proposed assistance program. All assistance programs must include provisions for adjusting rates as necessary, so that there is no negative financial impact on the electric or gas corporation.
