

HB 674 -- Fire Protection Sprinkler Systems

Sponsor: Dempsey

This bill requires the Department of Public Safety to establish rules requiring every residential care facility, assisted living facility, and skilled nursing facility to have a fire protection sprinkler system. Each system must be designed, installed, tested, repaired, and maintained in accordance with fire protection industry standards.

The department may also establish rules that require state-owned and -occupied offices or facilities to have a fire protection sprinkler system designed, installed, tested, repaired, and maintained in accordance with fire protection industry standards.
