

HB 873 -- Chiropractors

Sponsor: Portwood

This bill changes the laws regarding chiropractor education and licensing requirements. An applicant for licensure as a chiropractor must furnish the State Board of Chiropractic Examiners with evidence that he or she has completed the minimum number of hours of course study required by the Council on Chiropractic Education, or its successor, prior to beginning any doctoral course of study in chiropractic. However, the applicant must have completed at least 90 semester credit hours before beginning the doctoral course.
