

HB 967 -- Public Governmental Body Meetings

Sponsor: Bivins

This bill requires any public governmental body to make and retain a verbatim audio recording of any closed meeting. The audio recording will not be available for public inspection, but can be examined privately by a judge in a civil action to determine if there has been a violation of the Open Meetings Law, commonly referred to as the Sunshine Law. The penalty provision is repealed for the illegal recording of a closed meeting without permission from the public body.
