

HB 2568 -- Personal Care Services for Disabled Adults

Sponsor: Funderburk

This bill requires the Division of Senior and Disability Services within the Department of Health and Senior Services to establish, subject to appropriations, a pilot project to allow certain relative caregivers to provide personal care services for disabled adults who cannot self-direct their care. The relative caregiver will receive state assistance for personal care services in the same manner as a caregiver providing consumer-directed personal care services for disabled adults.
