FISCAL ANALYSIS

ASSUMPTION

Sections 188.052, 188.055 & 188.070:

Officials from the **University of Missouri** and the **Department of Insurance, Financial Institutions & Professional Registration** each assume the proposal would have no fiscal impact on their respective agencies.

Officials from the **Department of Social Services** assume since Department of Health and Senior Services has responsibility for overseeing the reporting requirements, there is no fiscal impact to the Department.

Officials from the **Department of Health and Senior Services (DHSS)** assume Section 188.052 requires additional data elements to be added to the Report of Induced Termination of Pregnancy form. It is estimated that an ITSD programmer will be needed for 55 hours in order to modify the current database to allow entry of the additional items required by the proposed legislation. This will result in a cost of \$3,795 (\$69/hour x 55 hours). This will be a one-time cost in FY 2010.

Expenses to the Bureau of Vital Records for the revision of the form will be negligible. The form will be made available to providers on a secured website, so printing will not be necessary.

Expenses to the Bureau of Health Informatics to publish an annual report on post-abortion care based on complication reports will be negligible.

Oversight assumes the DHSS could absorb the \$3,795 ITSD cost that may result from this proposal within existing resources. Oversight assumes if any significant fiscal increase were to occur due to this proposal, then the increase would be reflected in future budget request.
