

HB 127 -- Air and Water Pollution Violations

Sponsor: Flanigan

This bill imposes penalties on recycling companies that convert animal parts into petroleum which persistently violate the air or water pollution requirements of Sections 643.151 and 644.076, RSMo, including the loss of permits to operate the recycling plant.

Any second or subsequent violation of these provisions during a 36-month period will result in a penalty of at least \$10,000, but not more than \$30,000, for each day that the violation continues to occur.
