

HB 516 -- Jury Service

Sponsor: Hummel

Currently, upon timely application to the court, health care providers are excused from jury service. This bill removes the exclusion from jury duty and instead allows the court at its discretion to excuse a health care provider if he or she makes timely application to the court and provides a written statement certifying that he or she is providing health care services to patients and that serving on a jury would be detrimental to the health of his or her patients.
