

HB 679 -- Limited Licenses for Retired Dentists

Sponsor: Wasson

This bill establishes a limited license for a retired dentist. Dentists wishing to practice dentistry under a limited license must provide the Missouri Dental Board within the Department of Insurance, Financial Institutions and Professional Registration with evidence that they have practiced dentistry for at least 10 years and their license was in good standing at the time of their retirement. Dentists with limited licenses may only provide dental services without compensation to family members, public schools, and certain health departments and health centers.

The board cannot require more than five hours of continuing education annually and cannot charge an application fee of more than \$25.
