

HB 1525 -- Standard of Care for Bleeding Disorders

Sponsor: Schaaf

This bill establishes the standard of care for persons with bleeding disorders and requires the State Board of Pharmacy within the Department of Insurance, Financial Institutions and Professional Registration to establish rules governing the standard of care. Blood clotting product-related services are added to the list of covered services under the MO HealthNet Program; and pharmacies must dispense all prescriptions of blood clotting products as written by the prescribing physician, except in the case of an emergency.
