

HB 678 -- Excavation Notification Centers

Sponsor: Schatz

This bill extends, from December 31, 2011, to December 31, 2014, the requirement that the State Highways and Transportation Commission be a notification center participant regarding excavation involving underground facilities.

The provision is removed which requires the notification center to ask excavators, as part of the process to request the locating and marking of underground facilities, to identify whether or not the proposed excavation will be on a public right-of-way or easement dedicated to public use for vehicular traffic.
