

HB 1230 -- Labor Organization Campaign Finance Rules

Sponsor: Schoeller

This bill requires an employer or labor organization that wishes to implement payroll deductions for a donation to a candidate, campaign committee, political action committee, legislative campaign fund, political party, or person making disbursements for electioneering communications to obtain employee or member consent each year in writing. These provisions do not apply to voluntary member-owned trade associations operating only in this state or to first responders. These provisions must not be interpreted as denying a labor organization the right to receive and use dues for any legal purpose.
