

HB 1383 -- Missouri Accountability Portal

Sponsor: Cox

This bill requires every department and division of the state that receives any grant of federal funds of \$1 million or more to document certain information and make that information easily available on the Missouri accountability portal. This information must be updated within 30 days of any receipt or transferal of funds.

If a grant of federal funds is transferred to another department or division, the department or division receiving the funds must report to the department or division from which the funds came and account for how the funds were used and any statistical impact that can be determined to result from the usage.

The cost to administer these provisions must be paid from the grant of federal funds and not from any amount of state funds appropriated to any department or division. The Office of Administration must promulgate rules to implement these provisions.

The Governor must submit a daily report stating all amounts withheld from the state's operating budget for the current fiscal year. The daily report must be conspicuously posted on the accountability portal website, searchable by the amounts withheld from each individual fund, and searchable by the total amount withheld from the operating budget.

The bill contains an emergency clause.
