

HB 1581 -- Prescription Refills

Sponsor: Hodges

This bill requires all health insurers and health benefit plans that provide prescription drug coverage to allow an enrollee to fill a mail order prescription at an in-network retail pharmacy that chooses to participate by accepting the mail order pharmacy reimbursement rate to fill the prescription. The health insurer or health benefit plan cannot impose a copay or any other condition on an enrollee for using a participating retail pharmacy to fill a mail order prescription.
