

HB 1847 -- UNACCREDITED SCHOOLS

SPONSOR: Sommer

This bill requires the school board of any provisionally accredited or unaccredited district, and any district with a building performing at unaccredited levels, to enter a contract with the State Board of Education for the implementation of interventions for each building. When the contract is entered, the State Board of Education must not assign an accreditation classification below provisionally accredited for the duration of the contract. The State Board of Education may require the district to engage community partners to support school improvement within 30 days, or the contract will be void.
