

HB 1874 -- HEALTH INSURANCE REBATES

SPONSOR: Molendorp

This bill adds a patient with cancer who has been prescribed disease-managing medicines for which there is not a generic equivalent to those patients who are exempt from specified provisions regarding the receipt of health care payments and allows the patient to receive a partial rebate of his or her private health insurance co-payments and coinsurance from programs established by pharmaceutical companies for persons with chronic, potentially disabling, or life-threatening conditions.
