

SCS SB 639 -- MAMMOGRAPHY REPORTS

Beginning January 1, 2015, this bill requires a mammography facility, upon completion of a mammogram, to provide to the patient a specified notice regarding dense breast tissue stating that if the mammogram demonstrates that the patient has dense breast tissue which could hide abnormalities and has other risk factors that have been identified, the patient might benefit from a supplemental screening that may be suggested by the ordering physician.

These provisions must not be construed to create a duty of care beyond the duty to provide the notice required under the bill.

The information required by the bill or evidence that a person violated these provisions is not admissible in a civil, judicial, or administrative proceeding.
