

HB 1445 -- EMINENT DOMAIN

SPONSOR: Redmon

This bill prohibits the power of eminent domain from being exercised for any electric transmission line project in certain counties if the project is constructed entirely with private funds and users of the line pay for the transmission line. Currently, the only counties within which this prohibition would apply are Adair, Knox, Marion, and Schuyler counties.

The prohibition will not apply to any rural electric cooperative or municipally owned utility.

This bill is the same as HB 1237 (2015).
