

HB 2275 -- PHYSICIAN SUPERVISION

SPONSOR: Frederick

Currently, Missouri law permits a physician to enter into a collaborative practice arrangement with up to three full-time equivalent assistant physicians and up to three full-time equivalent advanced practice registered nurses, and may serve as a supervising physician for up to three full-time equivalent licensed physician assistants. This bill limits the number of collaborative practice arrangements a physician may participate in, and the number of physician assistants for whom a physician may serve as a supervisory physician, to a total of three.
