FISCAL ANALYSIS

ASSUMPTION

Officials at the **Department of Higher Education** assume there is no way to know how this change in the performance funding model would fiscally impact the institutions of higher education. The performance funding model is only used to distribute increased appropriations to the institutions by the General Assembly. In addition, the department is still collecting and testing data on the job placement performance measure and cannot predict institutions' results once implemented.

Officials at the **University of Missouri** assume they are unable to determine an exact impact on the University System; however, the legislation could result in less funding for the University as compared to the current performance funding formula.

Officials at the **University of Central Missouri (UCM)** assume UCM's current performance funding metrics are:

- First-time, full-time freshmen completion of 24 hours their first academic year.
- Total degrees awarded.
- Improvement in assessment of general education.
- Percent of university expenditures dedicated to core mission (instruction, research and public service).
- Percent of graduates earning degrees in professional and applied technology disciplines.

It is difficult to estimate an associated cost with this bill without knowing the specific requirements of the proposed performance measure relating to job placement.

Officials at the **Missouri Western State University** assume the impact cannot be accurately determined, since it requires the provision of additional state funds for performance funding. If additional funds are provided, it could have significant positive or negative impact, depending upon our results.

Officials at the **Missouri State University** assume this would have a negative fiscal impact of an undetermined amount.

Officials at the **State Fair Community College** assume forfeited performance funding of \$84,022

ASSUMPTION (continued)

Officials at the **St. Louis Community College** assume it is hard to specify the costs. Not sure how much of this information is already collected.

Officials at the **State Technical College of Missouri** assume there is no fiscal impact from this proposal.

Officials at the following colleges: Crowder, East Central Community College, Harris-Stowe, Jefferson College, Lincoln University, Metropolitan Community College, Moberly Area Community College, Missouri Southern State University, Northwest Missouri State University, Southeast Missouri State University, St. Charles Community College, Three Rivers Community College and the Truman State University did not respond to **Oversight's** request for fiscal impact.

FISCAL IMPACT - Small Business

No direct fiscal impact to small businesses would be expected as a result of this proposal.

FISCAL DESCRIPTION

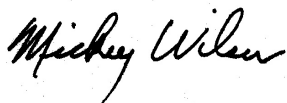

Beginning in calendar year 2019, public institutions of higher education, in collaboration with the coordinating board, will replace any existing institutional performance measure relating to sophomore retention, or any existing institutional performance measure relating to freshmen completing 24 hours in their first academic year, with an institutional performance measure relating to job placement in a field or position associated with the student's degree level and pursuit of a graduate degree.

Such job placement measure will be weighted as one-third of the performance funding allocation for each institution, with the four remaining measures counted equally as the remaining two-thirds of an institution's performance funding allocation. The success or failure of any institution to meet any of its performance measures will not affect the performance funding of any other institution. If an institution fails to meet its performance measures the forfeited funds will revert to general revenue.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
