

HB 927 -- PERFORMANCE MEASURES

SPONSOR: Eggleston

Beginning in calendar year 2019, public institutions of higher education, in collaboration with the coordinating board, will replace any existing institutional performance measure relating to sophomore retention, or any existing institutional performance measure relating to freshmen completing 24 hours in their first academic year, with an institutional performance measure relating to job placement in a field or position associated with the student's degree level and pursuit of a graduate degree.

Such job placement measure will be weighted as one-third of the performance funding allocation for each institution, with the four remaining measures counted equally as the remaining two-thirds of an institution's performance funding allocation. The success or failure of any institution to meet any of its performance measures will not affect the performance funding of any other institution. If an institution fails to meet its performance measures the forfeited funds will revert to general revenue.
