

HB 2345 -- PUBLIC WATER SUPPLY DISTRICT TRAINING

SPONSOR: Miller

Currently, board members of public water supply districts are required to complete a minimum of six hours of training regarding the responsibilities of the board before they are permitted to receive attendance fees or additional compensation.

This bill requires that the training must be completed within 180 days of each duly elected or appointed term of office. The restriction against payment of attendance fees and additional compensation prior to completion of training is removed; provided, however, that payments will not be made after the 180-day period if training is not completed.

This bill is similar to HB 666 (2017).
