Officials from the **Department of Agriculture (MDA)** assume the proposal will have no fiscal impact on their organization.

Oversight notes that MDA has stated the proposal would not have a direct fiscal impact on their organization. Oversight does not have any information to the contrary. Therefore, Oversight will reflect a zero impact on the fiscal note for MDA.

Officials from the **Missouri Department of Conservation (MDC)** assume this proposal will have a negative unknown fiscal impact caused by conflicting language between this statutory language and the Wildlife Code of Missouri that could lead to enforcement actions.

Oversight assumes MDC would not have a direct fiscal impact from this proposal.

FISCAL DESCRIPTION

This bill states that a landowner or the landowner's agent may use a night vision, infrared or a thermal imaging device, with verifiable consent from the landowner, while attempting to take or kill a feral hog on the landowner's property.

Currently, during firearms deer or turkey season, the Missouri Wildlife Code applies to a person attempting to take a feral hog. This bill removes that requirement.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
