FISCAL ANALYSIS

ASSUMPTION

Officials from **Department of Elementary and Secondary Education (DESE)** assume, subject to appropriation, the total cost to implement the bleeding control kits would be \$4,225,000. The cost per bleeding control kit is estimated at \$65.00 each. The number of classrooms in Missouri is estimated around 65,000.

65,000 classrooms x \$65.00 per kit = \$4,225,000 total cost

Officials from the **Department of Public Safety - Office of the Director** assume the proposal will have no fiscal impact on their organization.

Officials from the **Maries County R-1 School District** state, for our small school of 440 students, the estimated cost of this bill would be \$2,850 just for the medical supplies outlined in this bill. The training would be an on-going expense as well as purchasing additional supplies to keep them within the expiration date.

Oversight assumes the requirements in this proposal are subject to an appropriation by the General Assembly that would cover all costs. Oversight notes DESE estimated the cost to provide bleeding control kits to each classroom at \$4,225,000. Oversight assumes kits will not be used frequently, so restocking and annual training costs will be shown as Could exceed (\$100,000) in FY 22-23.

FISCAL IMPACT - Small Business

Could impact small businesses that provide supplies, materials, equipment, etc that will be provided in the bleeding control kit.

FISCAL DESCRIPTION

This bill defines "bleeding control kits" and requires the Department of Elementary and Secondary Education (DESE) to develop a traumatic blood loss protocol for school personal by January 1, 2021.

The bill outlines the specific requirements for the blood loss protocol which shall include a bleeding control kit in each classroom in a school district. Additionally, each district must designate a minimum of five school personnel to receive annual training on the use of a blood control kit.

The bill requires DESE and each school district and charter school to maintain information regarding the traumatic blood loss protocol and the Stop the Bleed national awareness campaign on their respective websites.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
