

HB 1489 -- LICENSED BOAT DEALERS

SPONSOR: Wood

Currently, an applicant for a license as a boat manufacturer or boat dealer must be certified by a member of the State Water Patrol stationed in the applicant's district or a member of the State Highway Patrol stationed in the applicant's troop area. This bill removes the provision allowing certification to be done by the State Water Patrol. The bill also allows a member of the State Highway Patrol to authorize any employee to perform the certification.

Currently, any person licensed as a manufacturer, motor vehicle dealer, boat dealer, motor vehicle auction must permit any member of the State Highway Patrol or State Water Patrol to inspect certain documents. This bill removes a member of the State Water Patrol from that authorization and also allows a member of the State Highway Patrol to authorize any employee to perform the inspection.
