

HB 2481 -- DEMENTIA TRAINING

SPONSOR: Morris (140)

Currently, the Department of Health and Senior Services is required to maintain minimum training requirements for persons involved in the delivery of care to persons with dementia. This bill requires that the department develop those standards in coordination with the Alzheimer's Association, and that it include certain types of initial and ongoing training for administrative employees and those delivering care.

The bill also requires the department to determine how often continuing education will be required and that the department provide oversight of the entities providing training. Finally, it requires the department to ensure that facilities are meeting training requirements and that persons who receive training are demonstrating the required proficiencies.
