

HB 261 -- MISSOURI NUCLEAR CLEAN POWER ACT

SPONSOR: Black (137)

This bill creates the "Missouri Nuclear Clean Power Act", which allows clean base load electric generating plants or facilities rated at 200 megawatts or more that utilize renewable sources to produce energy not in commercial operation as of August 28, 2021, to charge for costs associated with construction work in progress before the facility is operational.

The costs recovered by an electrical corporation are subject to inclusion or exclusion in a ratemaking proceeding under the authority of the Public Service Commission. The Commission may also authorize an electrical corporation to charge for additional amortization to maintain the corporations financial ratios that will better allow to cost-effectively construct a clean baseload generating plant or a renewable source generating facility.

This bill is similar to HB 1784 (2020).
