

HB 835 -- ELECTRIC ENERGY

SPONSOR: Haffner

This bill specifies that electric energy may be provided to any electric generating facility over a transformation and transmission interconnect under applicable federal tariffs of a regional transmission organization instead of under retail service tariffs filed with the Public Service Commission. However, any electric generating facility receiving power can only do so if its projected receipt of such power in a calendar year is no more than 2% of the total electricity produced by the facility in the previous year.

This bill is similar to HB 2540 (2020).
