The Missouri Department of Transportation (MoDOT) is testifying in opposition to HB 570. Providing a standard, consistent use of red signal indications is important to reduce driver confusion and promote safety. If this legislation were to be adopted, increased driver confusion would result as drivers would not know when left turns on red are allowed from one intersection to the next. Increased driver confusion can increase the risk of a crash. Left turn crashes often result in more severe injuries. In 2019 alone, Missouri experienced 8,708 left turn crashes at signalized intersections. Of these, 16 crashes resulted in fatalities and 215 crashes resulted in at least one serious injury. Thank you for your consideration of this important safety matter.
